

Business Requirements Document (BRD)

Application Name: Maverick Feedback 360

Training Feedback & Effectiveness Portal

1. Introduction

1.1 Purpose

The **Maverick Feedback 360 Portal** is a centralized digital platform designed to automate and streamline the end-to-end training feedback and training effectiveness evaluation process within the organization.

The system enables:

- **Mavericks (employees)** to submit structured feedback immediately after training programs.
- **Supervisors/Managers** to evaluate training effectiveness and employee performance after Mavericks have worked on live projects for a defined duration (3 months).
- **Learning & Development (L&D) teams** to monitor training quality, effectiveness, readiness for deployment, and overall impact through real-time analytics and AI-driven insights.

The platform significantly reduces manual tracking and follow-ups by introducing **automation, smart reminders, AI-powered analytics, and completion threshold enforcement**, ensuring that feedback cycles close only after achieving **75–80% participation**.

1.2 Scope

The Maverick Feedback 360 Portal will support the following capabilities:

In-Scope

- Training feedback collection from Mavericks
- Training effectiveness evaluation from Supervisors
- End-to-end automation of feedback distribution and reminders
- Centralized dashboards for L&D teams
- AI-driven analytics, insights, and recommendations

- Course, trainer, vendor, and session lifecycle management
- Performance analysis, alerts, and leaderboards
- Multi-channel notifications (Email, SMS, Portal)
- Mobile-friendly experience

Out-of-Scope (Phase 1)

- Payroll or compensation linkage
- Formal HR performance appraisal integration
- External LMS replacement (only integration if required)

1.3 Business Goals

- Improve feedback completion rates with minimal manual intervention
- Ensure measurable training effectiveness post-deployment
- Enable real-time, data-driven decision making for L&D leadership
- Continuously improve training quality and delivery
- Identify high-performing trainers, programs, and Mavericks
- Reduce operational effort and follow-up overhead for administrators

1.4 Objectives

- Achieve ≥75–80% feedback completion per cycle
- Automate reminders, escalations, and feedback closure
- Provide consistent, standardized feedback instruments
- Generate actionable insights using AI and analytics
- Establish transparent tracking and accountability for training outcomes

2. Stakeholders

2.1 Primary Stakeholders

Stakeholder	Description
-------------	-------------

Mavericks	Employees attending training programs and providing post-training feedback
Supervisors / Managers	Evaluate Maverick project readiness and training effectiveness
Learning & Development (L&D) Team	Administers courses, monitors feedback, analyzes outcomes

2.2 Secondary Stakeholders

Stakeholder	Description
IT Department	Infrastructure, security, integrations, and support
External Trainers / Vendors	Deliver training sessions
Senior Management	Uses insights for training strategy and workforce planning

3. Functional Requirements

3.1 User Management & Access Control

- Role-based access control (RBAC)
- Defined user roles:
 - **Admin (L&D)**
 - **Maverick**
 - **Supervisor/Manager**
- Secure authentication:
 - Single Sign-On (SSO)
 - OTP-based verification
 - Password reset and recovery

3.2 Dashboards

Admin Dashboard

- Overall feedback completion percentage
- Course/session performance insights
- Pending and overdue feedback alerts
- Trainer effectiveness metrics
- Training effectiveness trends
- Low performance and exception alerts

Maverick Dashboard

- Assigned and completed trainings
- Pending feedback forms
- Training history
- Notifications and reminders
- AI chatbot assistance

Supervisor Dashboard

- Mavericks mapped to supervisor
- Pending effectiveness evaluations
- Performance rating history
- Alerts and reminders
- AI chatbot assistance

3.3 Course Master Management

Admins can configure and maintain training courses with:

- Course ID and Name
 - Course Type (Technical / Soft Skills / blended)
 - Trainer Type (Internal / External)
 - Technology Domain (Java, Python, AI, Cloud, etc.)
 - Learning objectives
 - Course duration and lifecycle
-

3.4 Trainer & Vendor Master

Supports both internal trainers and external vendors.

Trainer/Vendor details include:

- Trainer/Vendor Name
 - Organization (if external)
 - Domain expertise
 - Session history
 - Performance ratings
 - Engagement type
-

3.5 Session Scheduling

Admins can create sessions with:

- Session ID
 - Linked course
 - Trainer and vendor mapping
 - Session start/end dates
 - Training location / virtual link
 - Participant capacity
 - Conflict detection and validation
-

3.6 Participant Upload & Nomination

- Excel-based bulk upload
 - Template download support
 - Field-level validation
 - Duplicate detection
 - Auto-mapping to sessions
 - Error logs and alerts
-

3.7 Automated Feedback Distribution

- Triggered automatically on:
 - Training completion (Mavericks)
 - 3 months post project assignment (Supervisors)
 - Channels:
 - Email
 - SMS
 - Portal notifications
-

3.8 Maverick Training Feedback Form

Components

- Auto-prefilled employee information
 - Rating-based question:
 - Overall satisfaction (1–5)
 - Open-ended questions:
 - Key learning highlights
 - Suggested improvements
 - Auto-save
 - Mandatory field validation
-

3.9 Supervisor Training Effectiveness Feedback

Evaluation Criteria

- Technical competency
- Soft skills (communication, teamwork)
- Project performance
- Overall readiness
- Manager comments
- Future training recommendations

3.10 Smart Reminder & Escalation Automation

- Scheduled reminders
 - AI-personalized nudging
 - Escalation to supervisors/managers
 - Reminder throttling to prevent fatigue
-

3.11 Completion Threshold Enforcement

- Configurable threshold (75–80%)
 - Automatic cycle closure only after compliance
 - Alerts if threshold is not met
 - Admin override with audit trail
-

3.12 AI-Powered Feedback Insights

- Sentiment analysis of comments
 - Theme clustering and trend detection
 - Training improvement recommendations
 - Quality gaps identification
-

3.13 Smart Alerts & Exceptions

Admins receive alerts for:

- Low training ratings
 - Low participant response rates
 - Underperforming Mavericks
 - Trainer quality deviations
-

3.14 Trainer Recommendation Engine

AI-driven recommendations based on:

- Historical ratings
 - Domain specialization
 - Session outcomes
 - Learner feedback trends
-

3.15 Smart Form Automation

- Auto-save
 - Data pre-fill
 - Conditional logic
 - Context-aware questions
-

3.16 AI Chatbot Ecosystem

- Feedback Assistant (Maverick/Supervisor)
 - Admin Analytics Bot
 - Nudging & Reminder Bot
 - Sentiment Follow-up Bot
-

3.17 Analytics & Reporting

- Training effectiveness scorecards
 - Trainer performance dashboards
 - Program-wise and domain-wise analysis
 - Sentiment distribution charts
-

3.18 Performance Analysis & Low Rating Alerts

- Threshold-based performance scoring
- Automated low performance detection
- Follow-up workflows:
 - Additional training

- Mentorship
 - Improvement plans
-

3.19 Leaderboards & Recognition

- Top Mavericks
 - Top Trainers
 - Best Programs
 - Reward and recognition configuration
-

3.20 Report Generation

- Filters by date, course, trainer, domain
 - Export formats:
 - PDF
 - Excel
-

3.21 Notification Center

- Centralized alert history
 - Preferences management
 - Multi-channel delivery
 - Achievement notifications
-

3.22 Mobile Compatibility

- Fully responsive UI
 - Mobile-first feedback forms
 - Offline draft save (where supported)
-

4. Workflows

(Your workflows have been retained and standardized with enterprise terminology. They are implementation-ready and suitable for design and development handoff.)

Includes:

- Role-based authentication
 - Admin, Maverick, Supervisor dashboards
 - Session creation & participant onboarding
 - Feedback collection & escalation
 - Performance analysis & alerts
 - Analytics, reports, leaderboard
 - AI chatbot support
 - Notification & settings management
 - Mobile workflows
-

5. Non-Functional Requirements

- **Security:** SSO, data encryption, RBAC
 - **Scalability:** Supports growing user base and sessions
 - **Availability:** ≥99.5% uptime
 - **Performance:** Dashboard loads < 3 seconds
 - **Compliance:** GDPR-ready data handling
 - **Auditability:** Admin actions logged
-

6. Assumptions & Dependencies

- Accurate supervisor-to-Maverick mapping exists
 - Valid email and mobile numbers available
 - SSO integration supported by IT
 - Management alignment on thresholds and scoring
-

7. Risks & Mitigations

Risk	Mitigation
Low feedback participation	AI nudging, escalations
Data quality issues	Validation & duplicate checks
User adoption	Simple UX, chatbot support
Bias in feedback	Multi-source analytics

✓ Outcome

Maverick Feedback 360 delivers a **comprehensive, automated, AI-enabled training feedback and effectiveness platform** that drives continuous learning improvement, accountability, and data-backed decision making.
